QUALITY & ENVIRONMENTAL POLICY

Senior Management define this **Quality, Environmental Policy**, which is realised through the statements and procedures referenced throughout the Policy Manual.

The policy ensures that the documentation is appropriate to the nature, scale and environmental impacts of its activities, products and services, and also includes a staff understanding of meeting both the requirements of ISO 14001 and ISO 9001.

It is our policy to manage our business in the most responsible manner, complying with the relevant legislation and regulations, aiming to provide our customers with an on time, fault free, reliable service.

We are committed to continuous improvement, the prevention of pollution, recycling, and exceeding our customer's expectations wherever possible.

The Management System provides a framework for the setting and reviewing of Objectives and Targets, to help support continuous improvement and ensure the system is developed.

This policy is documented, implemented and maintained, and communicated to all employees and sub-contractors via regular training with regard to our responsibilities. It shall be displayed in a prominent position within the organisation, where it may be viewed by visitors. It will be reviewed regularly to ensure its continued suitability and be available to the general public via our website.

Toby Jennings

Managing Director
